EXPERIENCE

Senior Manager, Product Management, AI/ML | *Duetto*

San Francisco, CA | April 2025 – Present

Set frontier AI vision and led org of 15; shipped 3 zero-to-one product lines and industry-first RL engine at scale

- Owned multi-year AI vision and strategy to transform static revenue workflows into an autonomous pricing platform; shipped production RL engine, scaling to 40% of user base in 6 months with 10% RevPAR lift and 10x throughput
- Launched Profit-Aware Pricing (zero-to-one), rapidly prototyping to validate total property profit optimization; scaled from 0 to 7K+ properties with 15% margin improvement, 3x-ing the platform's addressable pricing surface
- Delivered Group-Aware ML Pricing (zero-to-one), extending algorithmic pricing to conference, group, and enterprise bookings for the first time; captured previously unpriced demand segments and grew group-segment RevPAR by 8%
- Pioneered agentic AI with explainability enabling safe, beneficial autonomous pricing decisions; drove acceptance from 20% to 60%+ and lifted retention by 10%, outperforming industry leaders IDeaS and Lighthouse
- Replaced batch linear programming with real-time RL inference, 4x-ing optimization at 20% of cost and 10% of latency; landed enterprise clients (Hyatt, B&B Hotels) requiring faster pricing levers and granular control at scale
- Mentored 4 product analysts and 2 junior PMs; hired Analytics Manager to scale team capacity and operational rigor

Manager, Product Management | *Capital One Shopping*

San Francisco, CA | Dec 2023 – Dec 2024

P&L owner (\$8–12M); led 10-person cross-functional team, drove 30% ARR growth via data-driven execution

- Championed Capital One Shopping's first mobile surface (iOS Safari Extension), translating user insights into actionable product requirements; sold the mobile-first bet to leadership, growing from zero to 4M+ users at scale
- Rebuilt merchant onboarding from static data feeds to AI-powered ingestion of unstructured product data, scaling coverage from 100 to 60K+ merchants and cutting onboarding time from 4 days of manual QA to under 1 hour
- Designed personalized recommendation engine using multi-armed bandits, informed by user insights and beta pod testing; lifted CTR by 25% and revenue per active user by 12% across email, SMS, and on-page surfaces
- Built attribution and incrementality frameworks from the ground up; trained a product ops function for merchant issues at scale and drove 19% conversion lift across 400+ partners (eBay, DoorDash, Walmart) during peak periods

AI Product Manager II | *J.P. Morgan Chase & Co. (Digital Group)*

San Francisco, CA | June 2021 – Dec 2023

Promoted from PM I; led 15-person ML team building AI search, risk, and automation for 40K+ enterprises at scale

- Developed semantic search engine in close engineering collaboration, replacing manual document review for 40K+ commercial banking clients; elevated relevance and click engagement by 35% through ML-powered ranking
- Re-platformed KYC verification from legacy in-house build to integrated third-party solution, converting product requirements into execution that cut processing from days to under 30 seconds and lifted activation by 20%
- Deployed ML-powered expense automation and LLM-driven validations, using data-driven metrics to measure product success across enterprise workflows; drove 25%+ platform engagement lift and 8% incremental revenue

Technical Product Manager | *Wayfair*

Boston, MA | Oct 2020 – June 2021

Built zero-to-one routing engine across 20K+ suppliers and 20M+ shipments; scaled from 1 hub to 8 amid ambiguity

- In an ambiguous problem space, identified root-cause supply chain failures and pivoted from a planned dashboard to a constraint-based optimization engine; reduced overall failure rate by 20+% through data-driven iteration
- Reduced shipment shrinkage by ~15% and improved delivery performance by ~20% across domestic and intl hubs

SKILLS

Technical: Python, SQL, Reinforcement Learning, LLMs/RAG, Agentic AI, NLP, Ranking & Rec Systems, A/B Testing

Product: 0-to-1 Development, Vision & Strategy, Cross-Functional Leadership, Platform Strategy, User Research

EDUCATION

UC Berkeley – Dual BA in **Data Science** (ML, AI, Econometrics) and **Economics**

Berkeley, CA

Stanford University – **Y2E2 Cleantech Scholar** • Cleantech and systems innovation fellowship

Stanford, CA
